Re: Zone C, Site 30 Building NH 46
Site Identification # 01206
December 2005 Monitoring Report received 30 December 2005
Charleston County

Dear Mr. Magwood:

The Department has completed technical review of the referenced document. Interpretation of the analytical data provided in the referenced report indicates that chemicals of concern remain above established Risk-Based Screening Levels and MCLs. The Department concurs with the conclusions as presented in the report and routine groundwater monitoring and reporting should continue as prescribed in the Corrective Action Plan dated August 2000.

As a cost saving measure, CNB may place those wells that did not exhibit a MCL or RBSL violations during the December 2005 sampling event on an annual sampling regime. The wells with documented violations should remain on a semi-annual sampling regime.

Please note, assessment and remedial actions for this project fall under the provisions of the South Carolina Pollution Control Act and it is the goal of the Department to expedite remedial activities and achieve Class GB Groundwater Standards as defined in R. 61-68 *Water Classifications and Standards*.

Please submit the next groundwater monitoring report no later than 30 June 2006. Should you have any questions, please contact me at 803-898-3553 (office phone), 803-898-2893 (fax) or bishopma@dhec.sc.gov.

Sincerely,

Michael Bishop, Hydrogeologist
